Re: Automated Inspection Request System / Building Works

The City of Palm Coast Building Department will be introducing new automated inspection software soon called "*Building Works*".

Building Works will offer the same functions as the current system, but with additional features:

- Choosing an inspection date up to five (5) days in advance
- Playback of address location and inspection type for verification
- Online inspection scheduling
- Online payments

With the implementation of Building Works, the time will be extended to 7:00 a.m. for requesting or canceling inspections.

Please note that with the implementation of Building Works - outstanding fees due will now be required to be paid *prior to* the last/final inspection requested. This can now easily be done online and should not delay your requesting any inspections.

Look for the link from the city webpage soon - www.ci.palm-coast.fl.us
